

ERP LIFE CYCLE

Stage	Description
1.Planning	Identify needs set goals and form project
2. Design	plan system structure, work flow, and customization
3. Implementation	configure, customize, and test the ERP system
4. Go-live	launch the system for real users
4. Support	provide maintainance, updates, and user help

- Benefit
- 1. Improved efficiency; all departments connected in one system
 - 2. Better data accuracy; errors are from duplicate or outdated records are minimized
 - 3. Enhanced user experience; students and staff can easily access everything they need

- Limitation
- 1. Complex user interface; may find unintuitive without proper training
 - 2. Customization challenges; may require costly custom development
 - 3. Limited mobile access; some modules may not optimized for mobile and limiting access

5.Best vendor selection

Ellucian

The best vendor is **Ellucian Banner** that is a software system made for universities to manage student information,finance,HR, and academic records.Unlike generic ERPs,it already includes modules for admissions ,course registration, exams, and students service, which reduces customization cost.It is more affordable than Oracle and SAP, while still scalable enough for large students popullations.
