

Analysis & Research

Convenient snack delivery is consistently in demand during the busiest academic hours. A lot of students would choose on-campus delivery if it were possible. SnackDash's existing off-campus business approach restricts its market reach despite its potential.

Narrow Problem

- Specific Aspect: The lack of sufficient funding restricts growth and expansion efforts.
- Specific Problem: SnackDash cannot set up delivery stations or hire enough riders to serve on-campus students due to financial constraints.

Solution

The management and financial team is looking for an investment of RM50,000 to overcome this problem. The funds will be used to hire student riders, set up delivery stations, and run marketing efforts. To maintain long-term growth, the anticipated expansion will be backed by successful collaborations and perhaps crowdfunding.

SnackDash

SnackDash — "Your Campus, Your Cravings, Delivered."

Introduction

SnackDash is a rapidly expanding snack delivery business that aims to fast and reasonably fulfill students' desires. Despite SnackDash's success among off-campus students, many on-campus students still find it difficult to find quick snack options during late-night or busy study sessions. The difference draws attention to a huge growth opportunity.

Justification

- The establishment of on-campus delivery stations with storage shelves and compact refrigerators to maintain snack freshness will cost RM20,000.
- To increase brand awareness, RM15,000 will be set aside for marketing initiatives that include digital promotions, student ambassador programs, and campus gatherings.

Conclusion

SnackDash's on-campus growth is a crucial step in enhancing students' daily comfort and enhancing their academic lifestyle. The company can improve delivery efficiency, strengthen its infrastructure, and offer more easily available snack options where students need them most with RM50,000 in support.

- To provide flexible employment options for the university community, RM10,000 will be used to support the hiring and training of part-time student riders.
- To improve ordering speed and dependability, the remaining RM5,000 will go towards maintenance, logistics, and app upgrades.
